

Nikita Syreishchikov

Senior Frontend Engineer / Frontend Lead

Valencia, Spain | rtlpip@pm.me | amaryfilo.com | linkedin.com/in/amary-filo | github.com/amaryfilo

Professional Summary

Senior Frontend Engineer / Frontend Lead with 10+ years of experience building complex web products, with a focus on Angular, fintech, and Web3. I design scalable frontend architecture, reusable UI foundations, and product interfaces for transaction-heavy and wallet-connected user journeys. My experience spans customer-facing products, internal platforms, frontend modernization, and technical leadership across multiple product areas. I am comfortable working from early product direction and architectural decisions through delivery, team support, and long-term maintainability.

Core Expertise

Angular, TypeScript, Frontend Architecture, Reusable UI Systems, Product Delivery for Complex Flows, Technical Leadership, Cross-Team Collaboration, SSR / Performance Strategy, Frontend Modernization, Design Systems, Fintech & Web3 Interfaces, Wallet / Transaction Flows.

Experience

Independent Frontend Consultant

Sep 2025 – Present

Self-Employed

Valencia, Spain

I help fintech and Web3 teams accelerate frontend delivery through architecture consulting, reusable Angular foundations, and rapid product prototyping.

- Built a reusable Angular/Web3 foundation for wallet-connected and transaction-heavy product flows.
- Developed demo product modules for staking, auction, marketplace, and token-based interactions.
- Provided consulting on frontend architecture, SSR, performance, and reusable UI systems.

Frontend Team Lead

Nov 2023 – Sep 2025

Unlimit

Remote

Led the frontend stream for a crypto/fintech platform, owning frontend architecture, Angular modernization, reusable UI systems, and delivery across multiple product areas.

- Led frontend architecture and modernization of a complex Angular-based product.
- Improved internal tools and admin functionality to support maintainability and faster delivery.
- Built a reusable UI foundation shared across multiple projects.
- Delivered wallet-related and transaction-heavy product flows, including authentication, crypto payments, and balance features.
- Supported delivery through mentoring, documentation, technical interviews, and team collaboration.

Senior JS/TS Developer

Aug 2022 – Nov 2023

Unlimit

Limassol, Cyprus

Worked on a crypto/fintech platform, contributing to customer-facing product features, internal tools, and complex Angular-based frontend interfaces.

- Developed and maintained frontend product functionality for a banking/crypto platform with transaction-heavy user journeys.
- Worked on wallet-related flows, internal product areas, and scalable Angular interfaces for long-term platform growth.
- Collaborated with backend, product, and design teams to support delivery of customer-facing and operational product features.
- Contributed to frontend consistency, maintainability, and architecture evolution across the platform.

Frontend Team Lead

Feb 2022 – May 2022

Nodamatics

Remote

Joined a crypto web platform project to improve frontend structure and delivery flow.

- Simplified the frontend architecture with clearer module boundaries and a cleaner Angular structure.
- Supported delivery of crypto product features and high-performance landing pages.
- Improved workflow through planning, code reviews, mentoring, and design collaboration.

Frontend Team Lead

Feb 2021 – Jan 2022

Rock'n'Block

St. Petersburg, Russia

Led frontend delivery across Web3-oriented web and mobile products, helping teams build reusable interfaces, wallet-connected flows, and faster implementation patterns across projects.

- Led frontend work across web and mobile products in the crypto/Web3 space.
- Built reusable frontend solutions and shared component patterns to accelerate delivery across projects.
- Delivered wallet-connected user flows and contract-related product interfaces for dApp products.
- Contributed to planning, estimation, CI/CD, documentation, and cross-team collaboration.

Software Engineer

Dec 2019 – Jan 2022

Rock'n'Block

St. Petersburg, Russia

Delivered web and mobile product features for crypto-focused applications, including wallet-related flows and transaction-based user experiences.

- Built crypto wallet interfaces for iOS, Android, and web environments.
- Implemented token and transaction flows, including claim, deposit, and staking features.
- Contributed to product-facing frontend work, including performance and SEO improvements.
- Collaborated closely with backend and design teams on implementation and delivery.

Software Engineer

Feb 2019 – Aug 2019

Wallarm

Moscow, Russia

Worked on marketing and web platform initiatives involving CMS integrations, analytics implementation, and frontend delivery for content-driven web experiences.

- Built and maintained CMS-driven pages, forms, and marketing-related frontend components.
- Integrated analytics and event tracking to support funnel visibility and performance analysis.
- Contributed across frontend delivery and infrastructure-adjacent tasks.

Web Developer

Sep 2016 – Aug 2019

Grand Media Service

St. Petersburg, Russia

Built and launched commercial web projects end-to-end, including e-commerce sites, landing pages, CMS-based platforms, and marketing assets.

- Delivered websites from implementation to launch, including frontend development and CMS setup.
- Worked with e-commerce functionality, payment integrations, order flows, and analytics setup.
- Improved site performance through frontend optimization and basic server-side configuration.
- Built a strong foundation in shipping practical client-facing products with real business requirements.

Education**Peter the Great St. Petersburg Polytechnic University**

Bachelor's Degree, Business Informatics.

College of Information Technology

Technician Programmer, Computer Programming.

Technical Profile

Frontend engineer with strong Angular expertise and hands-on experience in fintech and Web3 products. Focused on scalable frontend architecture, reusable UI systems, and product foundations for transaction-heavy and wallet-connected interfaces. Comfortable working across product delivery, technical decision-making, frontend modernization, and long-term maintainability. Able to move from early architecture and prototyping to implementation, cleanup, and team support in growing product environments.

Technical Strengths

- Scalable frontend architecture and system design thinking.
- Reusable UI systems, design foundations, and shared product patterns.
- Delivery of complex product flows and wallet-connected product flows.
- Cross-team technical collaboration and frontend direction.
- Frontend modernisation, performance, maintainability, and cleanup.
- Hands-on technical leadership, mentoring, and delivery support.

Selected Technical Areas

- Angular, TypeScript, JavaScript.
- Signals, RxJS.
- SSR / performance / maintainability.
- Design systems and reusable UI foundations.
- Wallet flows and Web3 product interfaces.
- Smart contract-connected frontend logic.
- REST APIs, Node.js, Ionic.
- HTML, CSS, Sass, Git.

Demo Highlights

Wallet Tools

amaryfilo.com/demos/wallet-tools

Angular/Web3 demo focused on staking, auction, marketplace, and token-based product logic.

- Built frontend application and smart contract logic.
- Implemented staking, auction, marketplace, and wallet-connected flows.
- Deployed contracts to Sepolia / Base Sepolia environments.

DEX Tools

amaryfilo.com/demos/dex-tools

Angular/Web3 demo covering swaps, liquidity, farming, LP flows, and AMM-style mechanics.

- Built swap, liquidity, farming, and LP-based product flows.
- Implemented protocol-facing frontend interactions and smart contract logic.
- Deployed contracts to Sepolia / Base Sepolia environments.

What I Can Help With

Practical frontend support across architecture, product delivery, reusable systems, and complex fintech / Web3 flows from early technical direction to hands-on implementation and long-term maintainability.

- Establishing frontend architecture for new or evolving products.
- Building reusable UI foundations and shared implementation patterns for product teams.
- Structuring admin panels, internal tools, and complex product interfaces.
- Delivering transaction-heavy, wallet-connected, and operational product flows.
- Translating product logic into clean, maintainable frontend systems.
- Supporting frontend modernization, refactoring, and scalable growth.
- Helping teams improve delivery rhythm, consistency, and technical decision-making.
- Contributing as a hands-on senior / lead across implementation, architecture, and team support.
