

Nikita Syreishchikov

Senior Frontend Engineer / Angular Developer / Frontend Lead

Valencia, Spain | Remote | B2B Contractor

rtlpip@pm.me | amaryfilo.com | linkedin.com/in/amary-filo | github.com/amaryfilo

Summary

Senior Frontend Engineer / Angular Developer with 10 years building and modernizing scalable frontend systems for fintech, banking, Web3, and enterprise B2B platforms. Hands-on across Angular 13–21, TypeScript, RxJS, Signals, SSR, performance optimization, and web accessibility. Experienced in leading frontend teams up to 15 engineers while owning architecture, API contracts, migrations, delivery, and mentoring. Focused on resolving frontend architecture bottlenecks, improving scalability, and accelerating delivery for high-load products.

Skills

Frontend: Angular 13-21, TypeScript, JavaScript (ES6+), RxJS, Signals, SSR, React, Next.js, HTML5, CSS3, SCSS.

Architecture & UI: Frontend Architecture, Component Systems, Angular Material, shadcn/ui, State Management, Performance Optimization, Web Accessibility (WCAG, ARIA).

Integration: REST APIs, Backend-for-Frontend (BFF), Browser Extensions, Wallet Integrations, Smart Contract Interaction.

Web3: Ethers.js, Wagmi, WalletConnect, DApps, DeFi, DEX, Smart Wallets.

Domain Knowledge: Fintech & Enterprise Banking, B2B Client Portals, KYC / KYB Onboarding, Web3 Platforms.

Delivery & Tooling: Git, CI/CD, GitHub Actions, GitLab CI, Webpack, Vite, Agile, Mentoring, Team Leadership.

Experience

Independent Frontend Consultant

September 2025 – Present | Valencia, Spain

Architected Angular boilerplates across 10+ modules for enterprise, fintech, and Web3 products, reducing setup time by 70%. Standardized SSR, API boundaries, data flow patterns, and secure blockchain integrations to accelerate frontend launches.

Frontend Team Lead

Unlimit | November 2023 – September 2025 | Remote

Led frontend delivery for banking, B2B onboarding, and crypto products, combining hands-on Angular architecture with cross-functional coordination for high-load systems.

- Integrated 3 React developers into the Angular ecosystem, avoiding a high-risk core banking rewrite and saving 36+ man-months of engineering effort.
- Launched a stalled B2B KYB/KYC portal MVP in 3 weeks by replacing monolithic forms with automated Sumsb KYC flows, cutting manual processing overhead by 90% and onboarding 300+ corporate clients.
- Migrated the core web banking platform from Angular 14 to 17 for 1500 DAU, then rebuilt the internal admin app in 3 days with Angular 19 Signals. Improved TTM by 20–25% and removed 70% of legacy logic.
- Advocated and implemented a Backend-For-Frontend (BFF) approach, consolidating complex Salesforce queries and reducing frontend integration bugs by 30%.
- Streamlined team operations by building a comprehensive Confluence knowledge base, reducing ad-hoc questions by 40%. Successfully mentored cross-functional engineers and drove the hiring and onboarding of my Team Lead successor.

Senior Frontend Engineer

Unlimit | August 2022 – November 2023 | Remote

Owned frontend delivery for a non-custodial crypto wallet and Web3 R&D initiatives, focused on browser-extension architecture, secure session persistence, and external dApp integrations.

- Built a non-custodial crypto wallet browser extension from scratch to production in 3 months, autonomously delivering complex UI flows and secure session persistence.
- Developed custom browser APIs to connect the wallet with third-party dApps and MetaMask-like workflows.
- Built a Smart Wallet POC with Biconomy and ZeroDev that exposed legacy architecture bottlenecks and informed the Angular 16/17 modernization roadmap.

Frontend Team Lead

Nodamatics | February 2022 – May 2022 | Remote

Led a two-person frontend team through a time-critical migration to a modern Angular stack. Integrated generated gRPC clients for type-safe backend communication and connected the UI to a custom Ethereum node for secure transaction signing.

Frontend Team Lead

Rock'n'Block | February 2021 – January 2022 | Saint-Petersburg, Russia

Led frontend direction during rapid company growth, scaling the frontend team to 15 engineers while overseeing parallel delivery of multiple Web3 products across Angular, React, and Ionic.

- Hired 11 frontend engineers during company expansion from 7 to 60 total headcount. Established standardized interview matrices to ensure consistent code quality across Angular and React stacks.
- Orchestrated parallel delivery for multiple Web3 products, maintaining strong hands-on involvement to successfully release 5-7 production React applications while managing strict scope, budgets, and timelines.
- Engineered a framework-agnostic (RxJS) Web3 connection library to standardize MetaMask/WalletConnect integrations. Accelerated new project setup by 80% and published it as a successful open-source NPM package (@amfi/connect-wallet) with 20+ GitHub stars and 190+ weekly downloads.

Software Engineer

Rock'n'Block | December 2019 – February 2021 | Saint-Petersburg, Russia

Built Web3 products across web, mobile, and backend-adjacent layers (Angular, React, Ionic, Node.js, smart contracts).

- Engineered and launched multiple high-stakes DApps, including the Axion ecosystem which processed \$500k+ in token volume. Delivered a complex smart-contract token inheritance product within just 2 weeks of joining.
- Architected the Ducatus cross-platform mobile crypto wallet (20k+ downloads), implementing a custom Cordova bridge for NFC hardware signing, while autonomously maintaining the legacy Node.js backend.
- Streamlined end-to-end mobile release pipelines by resolving complex iOS/Android build bottlenecks, enabling self-serve app publishing and eliminating team technical dependencies.

Software Engineer

Wallarm | February 2019 – August 2019 | Remote, Russia

Built localized cybersecurity marketing pages and HubSpot lead-generation workflows using JavaScript, HTML/Less, Webpack, and Figma, including GA tracking for US marketing campaigns.

Web Developer

Grand Media Service | September 2016 – August 2019 | Saint-Petersburg, Russia

Built 10+ full-cycle e-commerce websites and maintained 30+ client platforms as the sole developer, covering scope estimation, CMS development, frontend implementation, and analytics integrations.

Education

Peter the Great Polytechnic University (Saint-Petersburg, Russia) – Bachelor's Degree, Business Informatics

College of Information Technology (Saint-Petersburg, Russia) – Technician Programmer, Computer Programming

Selected Projects

Enterprise Angular Admin Dashboard | demo.amaryfilo.com

Built a production-grade Angular demo architecture with complex data grids, advanced filtering, custom UI patterns, and robust network state handling for loading, empty, and error states.

Web3 & DeFi Demos | amaryfilo.com/demos

Built full-stack Web3 applications with Angular and custom smart contracts deployed to Sepolia/Base testnets, covering AMM mechanics, token staking, and decentralized auction flows.
